

Advances in Stroke Treatment and Rehabilitation: A Seminar for the Americas

March 18th, 2022 - 11:00am – 3:00pm CST

Webinar in English & Spanish

To learn more and register: sralab.org/ACV22

Advances in medicine are helping ever-increasing numbers of people survive stroke. With access to latest developments in stroke management and rehabilitation, we can think beyond survival and towards restored ability and quality of life. The unique partnership between stroke neurologists and physical medicine and rehabilitation experts from across the Americas will be on full display during this seminar. Presentations will cover a range of topics including scientific advances in transcranial magnetic stimulation, management of cerebral amyloid angiopathy, CT perfusion for acute stroke management and regional experiences and protocols. This seminar will deepen the relationship and collaboration between our institutions and other colleagues at the front lines of stroke care throughout the Americas.

Dr. Marco A. Alegría
Neurologist
Centro Médico ABC
Mexico City, Mexico

Dr. Esteban Basáez
